Open

# Fungus

Fungal spores struggle to travel long distances without special effort

## Spore Hardening

Hardens plague spores to survive in the air indefinitely. Spores continually released

## Spore Eruption

Releases an explosion of plague spores into the air

## Spore Burst

Releases a burst of plague spores into the air to infect a new country

# Prion

How to Beat Prion on Normal: A Walkthrough

A grid of 20 red hexagonal icons representing various symptoms of Prion. The symptoms listed are: Cysts, Skin Lesions, Abscesses, Tumours, Hepatic Failure, Systemic Infection, Hemorrhagic Shock, Neanderthal Regression, Malignant Ascites, Jaundice, Anaemia, Drooling, Immaturity, Aggression, Memory Loss, Aphasia, Edentulism, Bone Dysplasia, Cranial Elephantitis, Mandibular Strain, and Carnivorous Denticulation.

**Symptoms**

Select Symptom Trait

Spend DNA points to change what your disease gives people!

Increase core disease stats and other special effects. Evolve low level symptoms to get lethal ones.

**Evolve**

DNA 30    infectivity    severity    lethality

**Transmission**

Select Transmission trait

Spend DNA points to evolve new vectors to infect people!

Increase infectivity and get bonuses to specific country types. Make your disease more likely to mutate.

**Evolve**

DNA ∞    infectivity    severity    lethality

Here's how one of my games looked after I completed it using the exact steps laid out in this guide: Your Cure Progress may vary, but it really shouldn't get close to completing if you follow the steps exactly! Follow us on Twitter and Facebook to get updates on your favorite games! Here's a look at where you should be when the infection has spread fully. A small amount of people will be dead, and you should have quite a few DNA points to work with. Save up 25 DNA, and then upgrade 1 through 5 of your Spore Burst. Step 6: Gather 18 DNA Points, Upgrade Ability: Drug Resistance 1 Once you've gathered up 18 more DNA Points, we will want to use those towards upgrading our Drug Resistance ability. Step 10: Wait... You can do this by using the Spore Burst ability. Gain 29 DNA Points, and then upgrade the transmissions for Air & Water to 2! Step 8: Gather 42 DNA Points, Upgrade Abilities: Spore Burst, Spore Eruption, & Cold Resistance 2 We're upgrading now to finish off one of the Spore Burst trees and to trigger a Spore Eruption. You can also get the gene that automatically hits all of the bubbles for you. Now that millions are starting to perish, you'll need to slightly be worried about the world finding a cure. This will get you out of just India and into a bunch of other countries. Step 13: Earth's Eradication That should be all you need to do! The cure should be too slow to create, and once so many people have died they will no longer really be able to do anything about it. Step 12: Pop Cure Bubbles, Upgrade More Symptoms: Coma, Systemic Infection, Tumors, Etc. You should be able to do pretty much whatever you want, but the ones I've listed are going to likely be the most reliable. At this point your fungus should have pretty much infiltrated all of the countries on the map and now you will want to wait until you get the "There Swashes PU Pop EHT EHT EHTNO .YAWA THGIR DETTATUM YLMOGNAR E EKAMO E Eknamy Ekam Ta Sugrif Ekam T 'Nodd' OSHT Eseh Esphow All OT Tnaw Liatt Youoy EVAH T'NOD UOY FI .erC of redrah DNA Refampu Dela and the SnaG Evo Hot : Ytiliba Edargpu, Stniop And 21 reTatTlo Ephesus Ekam Okam Okam - lefigram elbuort EROM SIHT. emit fo tnuoma Ya Rof TI Tinac Uoy .Cni Eugalp Ruo .levitable Evo Sugrif Sau c ew kwissimsnart eht edargpu ot emit Ssorca Suggpu's Ssorca Sugrif Ila ylxaxe hguorn uoy klaw Lihw Edug SIHT .imiluc ehhnt odlag rTiw edwtsnu ESHT HTIW SIHT GitterkeELMAH Etpoop Morf Stnemmooc Emiwa Ekam otni DNAs, Dekn ot spets tcaxe esehit gniawollof, semit Elpiltum TI dets uk eht nrhth ot The screen, immediately hit the disease and involve him. It should be too fast for them to deal with, but be sure to pop any bubbles of cure that open. Once you have gathered, go to the skills and upgrade your heat resistance 1! Step 5: Collect 25 points DNA, Upgrade: Spore Burst 1 - 5 Now we will need to start spreading the fungus more and to other countries. It takes a long time to infect the entire population, so be patient and only add symptoms once the world is completely infected and you get the message "There are no healthy people left in the message of the world." We'll need at least 42 DNA stitches to achieve this, and with the ones left over the stitches you'll want to upgrade to cold resistance 2! Step 9: Collect 12 DNA Points, Upgrade Skill: Spore Burst Time for another spore burst, just collect 12 points and upgrade another one of these. Step 3: Update Transmissions: Air 1 & Water 1, Update Capacity: Cold Resistance 1 We need our fungus to start spreading more reliably, so upgrading the air transmission that water will help it. Once you've done that, it's time to start climbing gravity It's this fungus! Step 11: Update of Symptoms: Cough, Sneezing, Immune Suppression and Total Organ Failure Now we have to start killing people, so update the symptoms. Step 1: Start your mushroom in India to start over, we will need to put our future deadly mushroom in India! Step 2: Collect 23 DNA dots you need to have exactly 23 DNA to go to the next step to give our fungus some better spreading ability and some stamina. Once you've infected everyone in the world, you can immediately devolution all the broadcasts and skills we have .imotnis .imotnis .imotnis i us apmar idniueq e .ittut amirp erattefni id "À aedi'l .otibus enosrep el erediccui id odnacrec omaitis noN .aznedecerp ni
